

CONFIDENTIAL — VETERAN MEDICAL INFORMATION

Veterans Evidence Package for Medical Review

Veteran: Robin Example

Purpose: Physician review

Reviewer Role: Medical Professional

Prepared Using: EMF Veterans Evidence System

Reviewer Instructions

How to Use This Package

Review the Medical Opinion Requested, Issues Presented for Medical Review, and Questions for the Reviewing Physician first. Use the Key Evidence and Chronology for orientation to the principal medical evidence, then use the appendices to review the underlying source material.

Reviewer Guidance

Base any opinion on the evidence supplied, identify the specific records and medical/scientific literature relied upon, address medically applicable causation and aggravation questions separately, and explain the medical rationale for each opinion.

Executive Summary

Purpose of This Document

Purpose: Physician review. This package organizes the evidence supplied for independent medical review and is intended to help the reviewing medical professional locate and evaluate the relevant medical, lay, adjudicative, treatment-device, and medical/scientific evidence efficiently. It does not make a medical, legal, or adjudicative conclusion.

Evidence sources supplied for review: 1.

Package Guide

Issues Presented for Medical Review — Defines the review purpose, reviewer role, evidence scope, and limitations.

Key Evidence and Chronology — Provides chronological orientation to the principal medical evidence.

Questions for the Reviewing Physician — Lists the medical questions the reviewing physician is asked to address.

Appendix A — Medical Evidence — Contains clinical notes, diagnostic reports, treatment records, and related medical evidence.

Appendix B — Medical Opinion Evidence — Contains medical opinion and nexus evidence supplied for review.

Appendix C — Service Records — Contains relevant military service and service-treatment evidence.

Appendix D — Lay Evidence — Contains statements and observations from the veteran and other lay witnesses.

Appendix E — Adjudicative Records — Contains relevant VA decisions and adjudicative records.

Appendix F — Medical / Scientific Literature — Contains the medical/scientific literature supplied for review.

Issues Presented for Medical Review

Review purpose: Physician review

Reviewer role: Medical Professional

Evidence sources supplied for review: 1.

This package organizes evidence for independent medical review. It does not make a medical, legal, or adjudicative conclusion.

Key Evidence and Chronology

The chronology below uses evidence dates documented in the supplied source records. Medical sources without a documented evidence date remain listed after the dated entries and in the applicable appendix.

Additional Medical Evidence

Synthetic clinical source

Questions for the Reviewing Physician

Please address the questions that are medically applicable to the requested review and explain the rationale for each opinion.

1. What current diagnosis or diagnoses and clinically significant findings are supported by the supplied evidence?
2. What medical relationship, if any, is supported or not supported by the evidence for the claim issue under review?
3. If causation and aggravation are medically applicable to the requested review, address each separately.
4. Identify the specific records and medical or scientific literature relied upon, explain the medical rationale, and discuss material evidence that weighs against the opinion.

Appendix A — Medical Evidence

Contains clinical notes, diagnostic reports, treatment records, and related medical evidence.

Synthetic clinical source

Source: VA Blue Button Report

The following points were placed: All 10 points in both ears

Reason for Study: weakness

LAB RESULTS:

Test	Result	Units	Reference range
Sodium	138	mmol/L	135-145
Potassium	4.2	mmol/L	3.5-5.1

PLAN: Original source plan.

Appendix B — Medical Opinion Evidence

Contains medical opinion and nexus evidence supplied for review.

No medical opinion evidence is included in this package.

Appendix C — Service Records

Contains relevant military service and service-treatment evidence.

No service records are included in this package.
